

PixeliusVita – Asset Store Description (Unity)

Title: *Chibi Animal Cozy Pack – Modular Characters Humanoid (Rigged + Animations + Facial System)*

Overview

High-quality **stylized chibi animal pack** built for **indie & mobile games**.

Designed as a **modular character system**: reuse, swap, scale.

- Clean, readable shapes → perfect for **cozy / casual games**
 - Optimized for **mobile performance**
 - Ready-to-use for **simulation, farming, social, pet, cozy RPG**
-

Key Features

Characters

- 20+ unique animals (cat, dog, fox, owl, etc.)
- Unified art style (consistent shader, lighting, proportions)
- Fully rigged, ready for animation

Facial System

- 16+ facial expressions (happy, sad, angry, love, dizzy...)
- **Separated facial parts** → reusable across all characters
- Easy to swap for emotion system / dialogue system

Animation Library

- Humanoid Setup, can use Mixamo or Mocap Animation
- 64+ animation loops
- Idle / Walk / Run / Sit / Emote / Action
- Designed for **NPC + player reuse**

Variants System

- Outfit variations (shirts, hoodies, costumes)
 - Color variants
 - Mix & match workflow → create hundreds of combinations
-

Technical

- Mobile optimized (low poly, clean textures)
 - Works with URP
 - Clean hierarchy & naming
 - Easy prefab setup
 - Reusable across multiple projects
-

Use Cases

- Cozy games (Stardew-like)
 - Animal simulation / pet games
 - Social / idle games
 - Casual RPG / adventure
 - NPC population system
-

Design Philosophy

- **Modular > Unique assets**
→ one system = many variations
 - **Readable > Realistic**
→ better for mobile + gameplay clarity
 - **No over-detail**
→ faster iteration, scalable production
-

What You Get

- 20+ Characters
 - 64+ Animations
 - 16+ Facial Expressions
 - Outfit & Color Variants
 - Prefabs ready to use
-

Why This Pack

This is not just characters.

This is a **foundation system for cozy animal games**:

- Build NPC ecosystem fast
- Scale content without re-modeling
- Perfect for indie production speed

PixeliusVita – Stylized systems for scalable game production
